

b ~~(57) Abstract~~ ABSTRACT OF THE DISCLOSURE

The invention relates to a method for the transmission of messages by using a message service to a recipient who uses at least a primary mobile station (3), in which there is at least the possibility to receive calls and messages, and at least one secondary mobile station (4, 4'), in which there is at least the possibility to receive messages. The messages addressed to the primary mobile station (3) can be directed to any of the secondary mobile stations (4, 4') of the recipient, irrespective of calls.
